With every bulb order we plan to pack a leaflet with information that will help to make bulb culture successful for you. Make sure that you receive your copy.

Kindly note that in some years the skins of Tulips are so hard and firmly attached that the roots cannot push through. This is especially true of some Double Tulips. If you receive a stock with uncracked skins, it will pay you to break off a portion of the husks before planting.

We recommend the use of Pure Bonemead as the safest and best fertilizer to use when planting bulbs. See the rear page.
